NEGAR TILE

PORCELAIN TILE

1985 - 2023

Negar Tile, Beautiful forever

Using the latest technology, NEGARTILE Industries started working in 1985 with the help of experienced workers and the production of various porcelain products and glazed floor tiles. With Italian-Spanish machines and the latest digital printing machine available in Iran, this company has the possibility of producing porcelain ceramics with the highest resolution and quality in sizes 80*80 and 120*60.

In line with the development of quality, in addition to obtaining mandatory standard certificates, NEGARTILE Industries has succeeded in obtaining other international quality and system certificates, including ISO 9001, ISO 14001, ISO 13006, ISO 45001 and European CE.

Our research and development unit seeks to produce special products, including anti-acid tiles with very high resistance to industrial acids, translucence tiles with high back visibility, antibacterial and self-cleaning, as well as the production of products with high thicknesses.

Due to the good quality, design diversity and customer satisfaction since the beginning of the factory, the sales volume has always been on the rise. The success in gaining market share is not only limited to the domestic markets, but there has also been a growing and upward trend in the field of exports, including exports to the continent of Asia and Europe.

At NEGARTILE Industries, we seek to increase quality production and increase our share in the market with seriousness and continuous efforts to satisfy our stakeholders.
